Alon Biger

Civil Engineering Student | Civil Engineering Intern at SSR
Tickle College of Engineering Student Assistant | NCAA Student-Athlete
Engineering Automation & Applied AI

Knoxville & Nashville, TN | alon.biger.2005@gmail.com | linkedin.com/in/alon-biger | alonbiger.com

EDUCATION

University of Tennessee, Knoxville – Tickle College of Engineering — Expected May 2028
Bachelor of Science in Civil Engineering | Entered Fall 2026 via the Maryville College–UTK dual-degree pathway

Maryville College – Maryville, TN — 2024 – 2026
Engineering dual-degree pathway toward a Bachelor of Arts in Engineering

PROFESSIONAL EXPERIENCE

Smith Seckman Reid, Inc. (SSR) – Nashville, TN — May 2026 – Present
Civil Engineering Intern | *Full-time Summer 2026; continued part-time during Fall 2026 while attending UTK*

- Proposed and led an eight-person, cross-disciplinary intern team developing the Technical Writing & Export Agent; continue advancing the platform with template routing, guided intake, document extraction, AI-ready template workflows, and Word/PDF output.
- Authored the Civil group's AP-based technical writing guide, which became the rule foundation for an AI-assisted technical-writing workflow.
- Completed a theoretical Nashville MLB ballpark civil/site feasibility study covering site selection, grading, utilities, site planning, infrastructure coordination, and permitting.
- Developed an interactive Civil Project Playbook prototype translating a detailed project-delivery workflow into task status, schedule, budget/labor, collaboration, and reporting views.
- Coordinated approximately 615 valve records across contractor/process and engineering drawing sets using Excel and Bluebeam Revu, documenting locations, sheet references, and discrepancies for project review.

University of Tennessee, Knoxville – Tickle College of Engineering — Sep 2026 – Present
Student Assistant (AI Training Hub developer), Civil & Environmental Engineering

- Developing the AI Training Hub for UTK Engineering students with Dr. Jennifer Retherford, an expanding learning platform designed to build practical AI application knowledge across engineering workflows and prepare students to enter engineering firms with the AI fluency to contribute immediately.
- Built and deployed Module 1 (technical introductions) in Canvas and as a standalone site, with 10 guided steps, 9 instructional videos, and reusable agent instructions; now in use in CE 205. Developing Module 2 on technical presentations.

Lake Forest Homes, Inc. — Summer 2025
Construction Management Shadowing

- Shadowed the site manager on residential projects, gaining exposure to scheduling, subcontractor coordination, safety planning, and daily site logistics.

SELECTED PROJECTS

CoachMatch+ (2026) – Founded an AI-assisted platform connecting athletes with private coaches; led product concept, UX, branding, and iterative web-app development.

Maryville Soccer Camp Website (2026) – Rebuilt the college soccer camp website into a modern, easier-to-maintain experience with structured content and a built-in FAQ assistant.

LEADERSHIP & ATHLETICS

NCAA Men's Soccer Goalkeeper – Maryville College — 2024 – Present
Semi-Professional Goalkeeper – Dream FC — Summers 2025 & 2026
Resident Assistant – Maryville College — 2025 – 2026
Mentored first-year students, planned community programs, and handled conflict resolution and residential leadership responsibilities.

SKILLS

Engineering:	Bluebeam Revu, Excel, drawing & document coordination, site feasibility research, technical documentation
Software & AI:	Claude & Claude Code, ChatGPT, prompt & AI-agent design, HTML, CSS, JavaScript, Python, Playwright testing, Git & GitHub, Canvas LMS
Communication:	AP-style technical writing, proposal workflows, instructional design, project management
Languages:	English (fluent), Hebrew (fluent)
